# How it is done in Russia?

All space missions in the Russian Federation are operating under the guidance of two main documents:

1. The Federal Law of the Space Activity of the Russian Federation;
2. The Federal Space Program (FSP) of the Russian Federation.

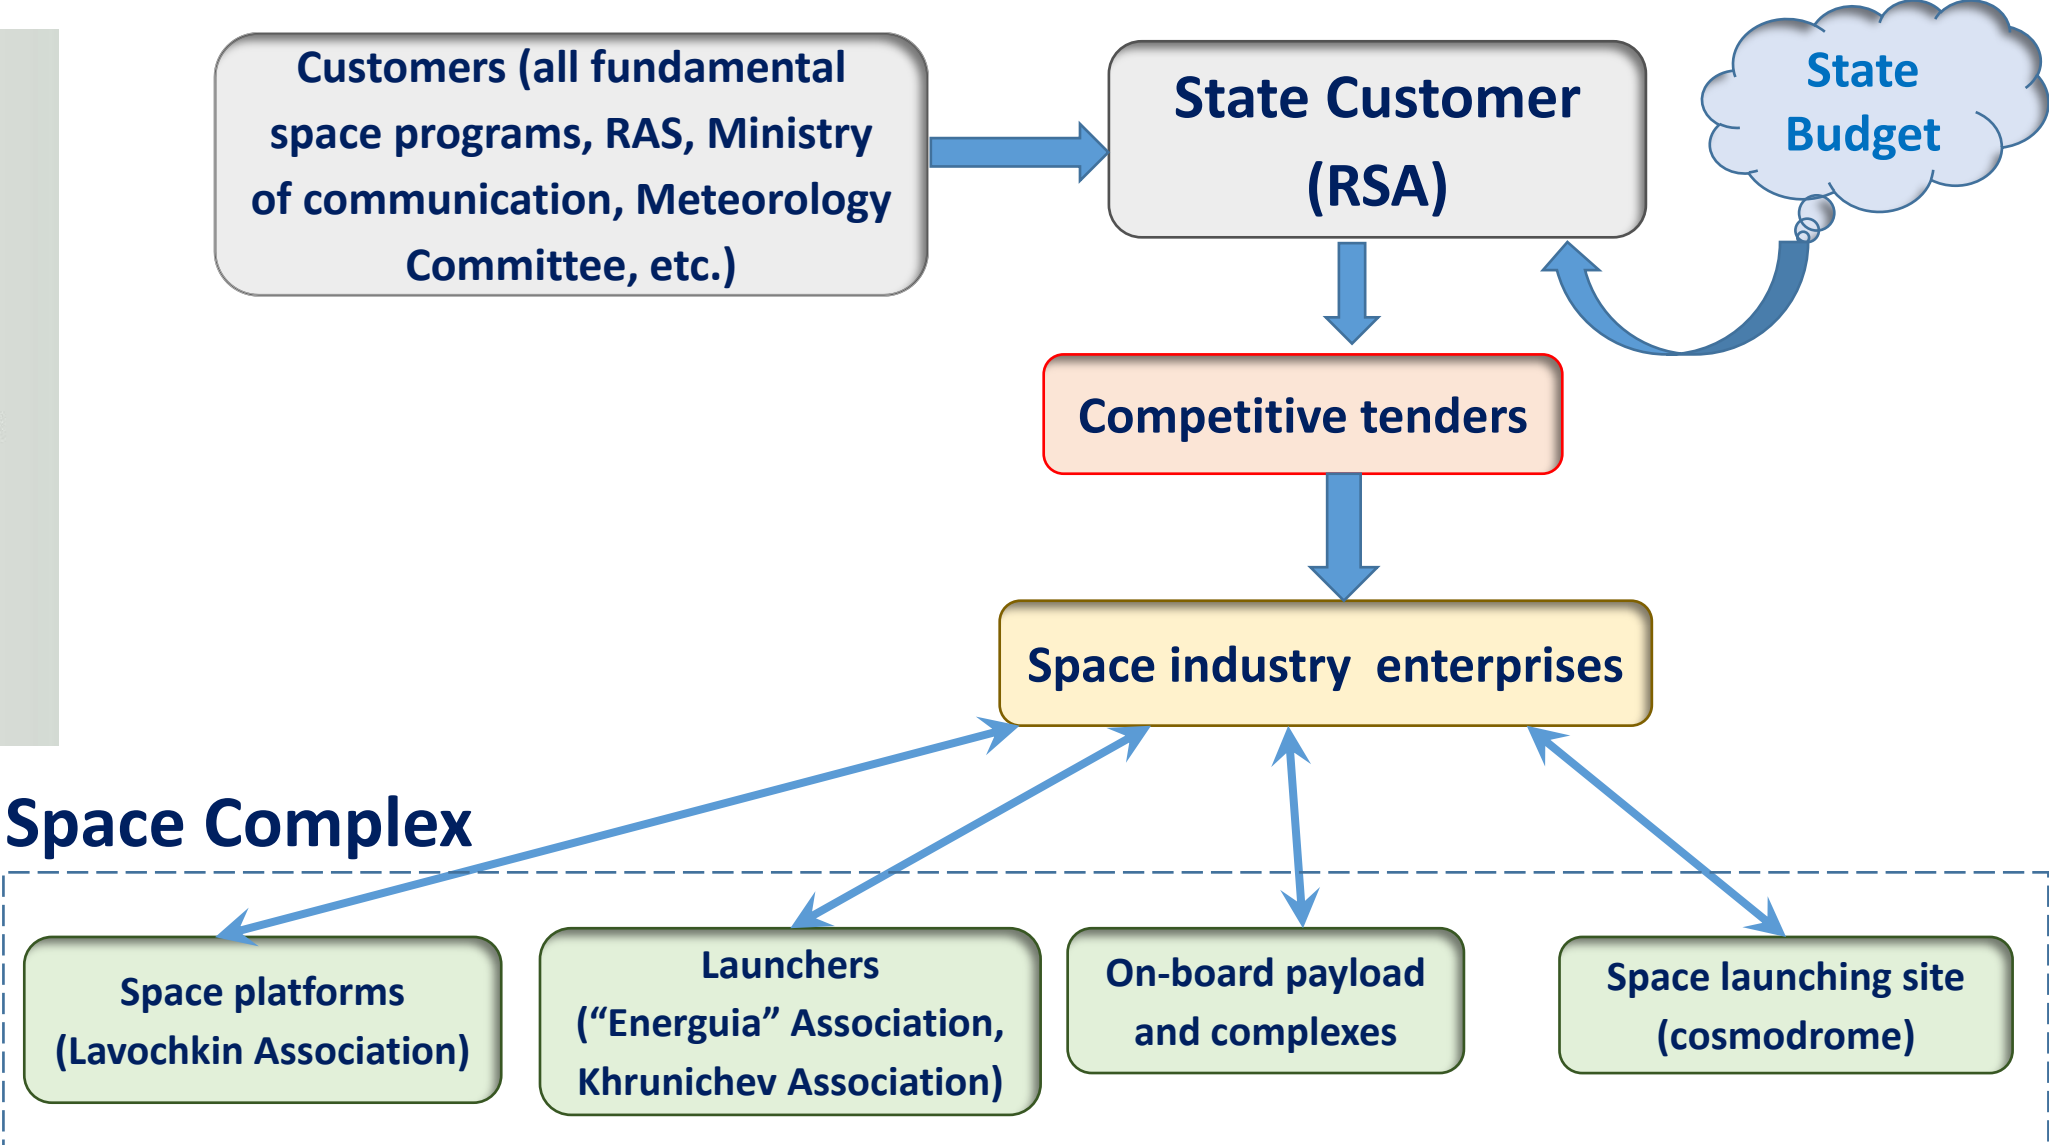

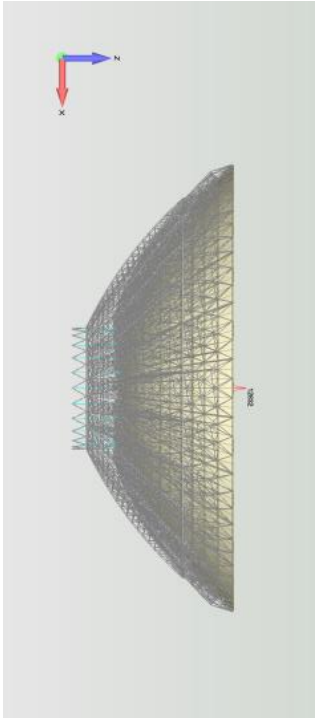

# Place of Millimetron in the Russian Space Federal Program

According to FSP the state contract between Roscosmos and ASC was signed in 2016, and Roscosmos covers all expenses **for the development of “Millimetron” space complex in Russian Federation, delivery of a launcher (Angara 5) and launch of the complex to a given orbit.**

# Scientific Space Mission Diagram

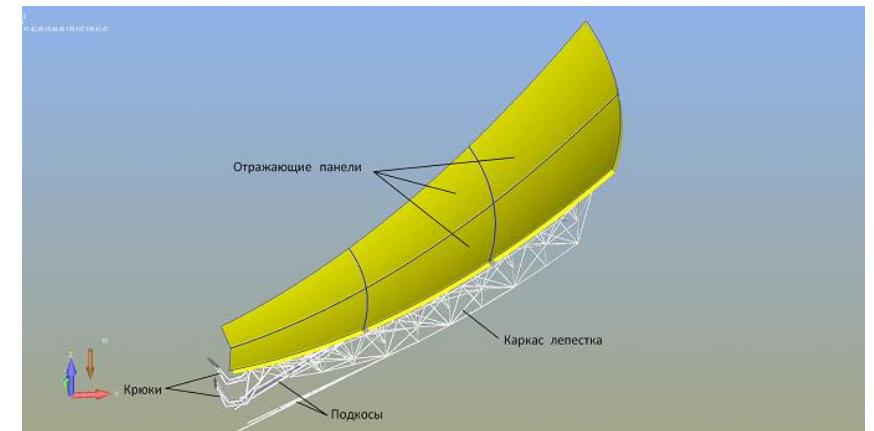

# Summary

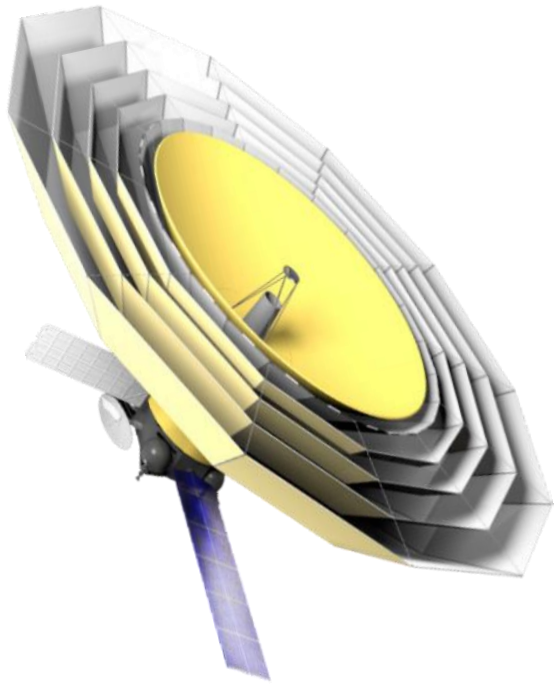

According to FSP the state contract between Roscosmos and ASC was signed in 2016, and Roscosmos will cover all expenses for:

- **Antenna**
- **Cryo-container**
- **Space Bus (Navigator-M)**
- **VLBI Instruments**
- **Rocket/launch (Angara-5)**
- **Ground support and mission control**
- **Data center**

# Thank you!
